PAPER VOID FILLING SYSTEM

# Ri-Fill

## PAPER VOID FILLING SYSTEM

Paper void fill is a fast and effective way to absorb empty space inside the carton. It's environmentally friendly and great way to secure items during transit.

The system is available in either table side, minimising floor space or complete with portable floor stand for ease of integration.

Utilising unique converting technology, *Ri-Fill* offers the following features:

- **Anti-jamming technology - reducing downtime**
- **Running at 1.7 metres per second *Ri-Fill* is up to 21% more efficient than equivalent machines.**
- **Auto-cut feature allows the exact amount of material to be used, taking full control of pack costs.**
- **Easy to use digital control panel allows the operator to programme the amount of paper required or simply run the machine from the foot switch.**
- **A simple modular construction allows installation to be completed in under 6 minutes.**
- **The *Ri-Fill* is designed to fully integrate to the workplace, further increasing productivity.**

Fully adjustable head to divert the paper

Simple to use length control feature

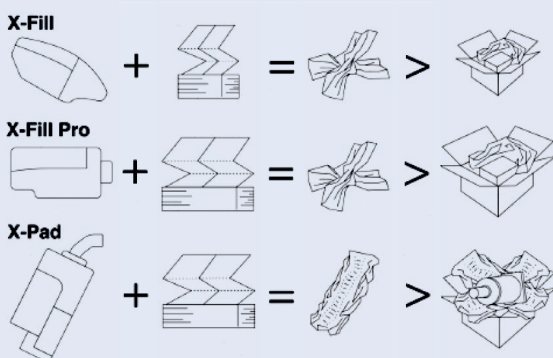

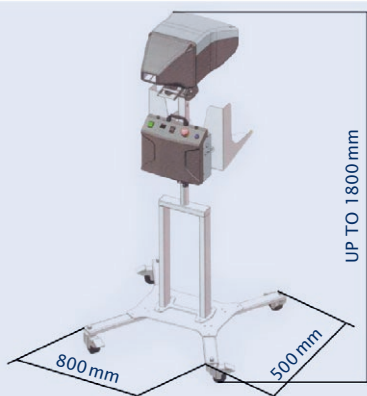

Consistent paper feed mechanism

Lockable and secure castors

*Ri-Fill* paper is ideal for various sized items without increasing your carton stock

Dimensions max. (LxWxH)	500x800x1800mm
Weight	26kg table side, 52kg portable stand
Power supply	230v 50Hz
Power usage	100W
Output type	pre-set/continuous void fill
Output rate	> 1.7m/s
Paper stock	single ply
