PAPER PAD CUSHIONING SYSTEM

Ri-Pad

PAPER PAD CUSHIONING SYSTEM

Paper padding is a versatile cushioning material designed to offer maximum protection and shock absorption for the safe transit of fragile items.

In application the pads are used to line the inside of the carton in a variety of packing techniques from Cushioning, Wrapping, Blocking and Bracing or simple Void Fill.

Utilising unique converting technology, *Ri-Pad* offers the following features:

- **Anti-jamming technology - reducing downtime**
- **Running at 0.9 metres per second *Ri-Pad* is up to 75% more efficient than equivalent machines.**
- **Auto-cut feature allows the exact amount of material to be used, taking full control of pack costs.**
- **Easy to use touch screen control panel allows the operator to programme and store frequently used pad sizes.**
- **A simple modular construction allows installation to be completed in under 8 minutes.**
- **The *Ri-Pad* is designed to fully integrate to the workplace, further increasing productivity.**

Ri-Pad dispensed cushioning paper offers superior protection and shock absorbency for the safe transit of delicate products.

Quick and easy paper reloading

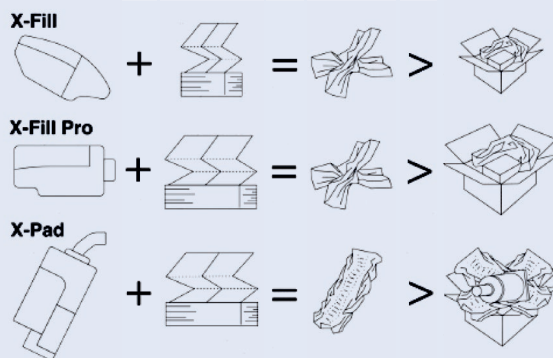

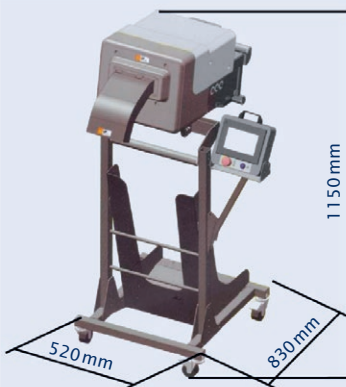

Digital screen control panel

Lockable castors for extra stability

The head position can be altered to dispense the paper where required

Dimensions (LxWxH)	830x520x1150mm
Weight	48kg
Power supply	230v 50Hz
Power usage	200W
Output type	pre-set, sequential or continuous
Output rate	0.2-0.9m/s
Paper stock	single and two ply cushioning
